everywhere.

Anytime, Anywhere Remote Access to Your PC

ONE CLICK. TOTAL ACCESS.

How many times have you wished you could quickly and easily access your remote PC?

Now you can – with one click and no hassle.

Laplink Everywhere provides one-click remote access to files, email, programs, contacts and more – anytime, anywhere. You'll never need to worry about being out of touch or not having access to important data no matter where it is, and no matter where you are.

Whether using your smartphone, the Laplink Toolbar, or the Laplink Everywhere web site, you will have the easiest and most powerful remote access available today.

You will never need to rush back to the office to send that important file, or panic when you arrive at a meeting without your presentation. With Laplink Everywhere you always have access to everything you need.

No other product gives you the instant access to your remote PC that you get with Laplink Everywhere. From one-click access to email, full screen remote control, or remote search and forward (even from your smartphone), Laplink Everywhere does it all.
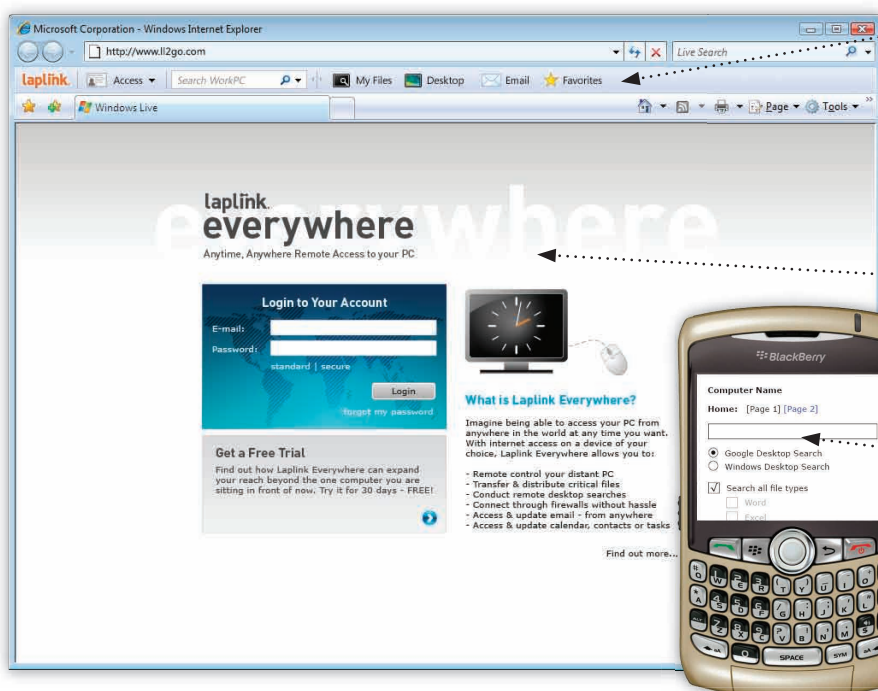

Stay in touch and maintain productivity even when you leave your laptop behind. Whether at home, in the office, or on the road, you are always just one click away from your PC.

Laplink Everywhere is truly a revolutionary product that will change how you think about remote access and remote control.

Access your remote PC like you are sitting in front of it. Use your Smartphone to find and forward a file using remote email and desktop access on your remote PC.

Now you can have total remote access – total control - all with just one click.

3 EASY WAYS TO ACCESS YOUR REMOTE PC:

1 Laplink Toolbar

When you install the Laplink Toolbar, your browser (IE 6 or later) provides you with instant one-click access to your remote PC. Check your email, search your remote PC, or launch full remote control – fast, easy, and just one click.

2 Web browser

Just browse to LL2go.com from anywhere in the world, login, and access your remote PC. It's safe, secure, and incredibly simple to use.

3 Mobile Phones

With one click from your mobile phone, launch the Laplink remote search window. Instantly search your remote PC and forward the results using email on our remote PC. Fast, simple, and intuitive – even using a low-bandwidth connection like GPRS.

everywhere.

Anytime, Anywhere Remote Access to Your PC
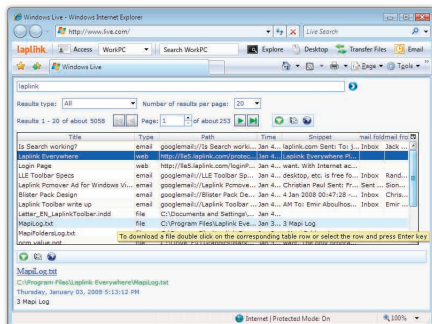

Get instant and secure access to your remote PCs no matter where they are – no VPN required. With Laplink's new Toolbar you get one click access to files, email, network resources, databases and much more- even full remote control!
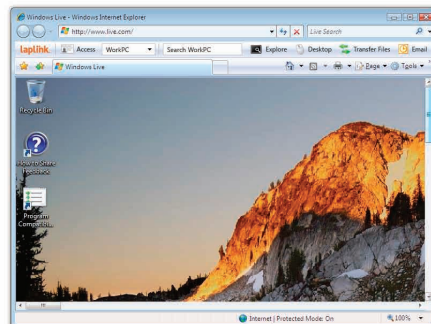

|
